

A **Microsoft Rapid Assessment** will provide your organization with access to a server migration or cybersecurity-focused assessment designed to provide your organization with data, insights, and actionable recommendations to help guide you on your cloud migration journey and to improve your security posture

The Rapid Assessment Report will reflect insights specific to your organization's IT environment. You choose the best assessment type to align with your current business priorities.

RAPID MIGRATION ASSESSMENT

Uses Azure Migrate to provide a comprehensive review of your organization's server infrastructure and to provide guidance and recommendations on prioritizing workloads to migrate to cloud.

RAPID SECURITY ASSESSMENT

Uses the Cybersecurity Assessment Tool (CSAT) from QS Solutions to provide an analysis of your organization's security posture—evaluating vulnerabilities, identity, and compliance risks with actionable, ranked remediation recommendations based on your data.

We will help you guide you through a 4-phased approach. End-to-end assessment time is typically 2-3 weeks and involved 4-8 hours of time investment from your team.

Planning

Identify business goals and objectives.

Data collection

Uses tools to provide a clear picture of the current data estate.

Analysis

Optimize investments with a detailed server infrastructure or security analysis.

Action

Implement a strategic plan to help guide your organization on its cloud journey.
